> Well, not quite!

Well, if ye be fair bye the winde an' yer hatches be squarely battened,
then, bye the blustery Seven Seas, be it a fair chance ye be 'eard.
Indeed, it were a fine and goodly watch, with some eight o' the brethren
o' the ether, aboard.....

Big Bertha Radiomarine a' belchin' she were, but puttin' out a fine
signal she did.....

Miss Henrietta Hartley were a bit overpowered by the QRN but that
ancient denizen o' the deep, BCus-375us, did put forthe with goodly
emanations, a readable signal amidst the crackle 'n' din.....

> controls...obviously it is not made for the L00000W end of the
> band! The tuner got things down to 1.5:1 though. Loss? What loss?

Loss, be a thing o' the textbook larnin' kiddies, an' not of such
gentlemen o' the ether as we be.....

If yer springs o' the bed be of sufficient strength and merit to
set forthe with a goodly current, then load them bye the byes an
plies the ether seas with the crew.....

> I was nervous about loading up to full power with everything
> counterclockwise on the rig :-) so I left it at 40W out. Bob

> Conard couldn't hear me but Bob was kind enough to relay.

Nervous, ye be, nay perhaps a bit with de ol' butterflies o' the
gullet, as once were when novices o' the ether we be....

But, heard ye were, an' joins in ye should, as canst ye be aboard
when the tides they do permit.....

> Obviously I can't do this reliably, and would rather GB on
> 80 when schedules permit. But I urge the rest of you who

> or more you have to do better than I did.

Aye', there be fine and goodly emissions to be had with even a chance
wire o' ten metres of length. Merely load her till the field strength
meter at the max she be..... That heathen SWR and nefarious turbulence
of reactances and resistances be just so much of the imagination.
Load till yer conscience hurts, yer bottles glow dull red, an' yer
field strength peaks upon the ether..... Silycon chippes need fear
such waters, since they be of a sensitive and sickly nature.....
Bottles of fire, glowing brightly, need fear not, but tune to the peak
and be of good and bright cheer.....

As the season be ending by the Ides of March, maybees will the crew
jump ship to a new and fine QRG on the short wave of eighty-four and
eighty-seven hundredths of a metre. That be a fine and goodly QRG
for the summer watch, as we plys the Seven Seas of the ethers, an'

buzzes our sparks, an' arcs our arcs, an' glows forthrightly into the night.....

> 73 from Mass.
> --Andy
> wallace@mc.com

73 Andy and all the Fine and Goodly Crew aboard the BA/GB watch!
160 were a blast that night, she be.....

Bob/NA4G
